LONG TERM TREASURY ■

FACTSHEET

Marketing  
Communication

30/06/2026

Under the ESMA rules or the FCA rules, funds distributed in the EU or the UK are not allowed to report performance returns if the fund is less than 12 months old.

Risk Indicator (Source : Fund Admin)

Lower Risk

Higher Risk

The SRI represents the risk and return profile as presented in the Key Information Document (KID). The lowest category does not imply that there is no risk. The SRI is not guaranteed and may change over time. The risk indicator assumes you keep the product for 3 Months. The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movement in the markets or because we are not able to pay you.

## BONDS ■

## PORTFOLIO ANALYSIS BY INSTRUMENT TYPE

## SECURED VS NON-SECURED LENDING % OF NET ASSETS

## Objective and Investment Policy

The investment objective of the Sub-Fund is to reflect the performance of the euro short-term rate ("SARON") compounded rate (the "Benchmark Index") and to minimize the tracking error between the net asset value of the Sub-Fund and the performance of the Benchmark Index. For hedged share classes, the Sub-Fund will also use a daily currency-hedge strategy, in order to minimize the impact of the evolution of each respective share class currency against Euro. The Benchmark Index for investments in these share-classes not denominated in Euro and hedged against Euro is the equivalent overnight money market rate for the currency of the related share class (SARON for CHF-hedged share classes).
