What is this product?

Type: Shares of a sub-fund of MULTI UNITS FRANCE, a UCITS (Undertaking for Collective Investment in Transferable Securities), established in the form of a SICAV.

Term: The product has a duration of 99 years. The Management Company may dissolve the product by means of liquidation or merger with another product in accordance with legal requirements.

AMF Classification ("Autorité des Marchés Financiers"): International equities

Objectives: The Sub-fund is a passively managed index-based UCITS.

The Sub-fund's objective is to replicate the performance, both upwards and downwards, of the MSCI China A Net Total Return Index (net dividends reinvested) (the "Benchmark"), denominated in US dollars, while minimising the tracking error between the Fund's performance and that of the Benchmark.

The expected level of the Tracking Error under normal market conditions is indicated in the Fund prospectus.

The Benchmark is representative of the performance of the "A shares" market, i.e. securities issued by large- and mid-cap companies incorporated in the People's Republic of China ("PRC") excluding Hong Kong and Macau, which are traded on the Shanghai and Shenzhen stock exchanges and quoted in Chinese Yuan ("CNY").

Investors' attention is drawn to the specific risks linked with investing in the PRC as further described in the Risk Profile section of the Prospectus.

The Sub-fund aims to achieve its objective through direct replication, namely by investing primarily in the components of the Benchmark.

In order to optimise Benchmark replication, the Fund may use a sampling technique and guaranteed temporary sales of securities.

Any use of these techniques is indicated on the website amundiETF.com.

The updated composition of the portfolio of securities held by the Fund is mentioned on the website amundiETF.com.

More detailed information on MSCI indices is available on the MSCI website (www.msci.com).

In addition, the indicative net asset value appears on the Fund's Reuters and Bloomberg pages and may also be mentioned on the Fund's stock exchange websites.

Intended retail investors: This product is intended for investors with a basic knowledge and/or no or limited experience of investing in funds, who are seeking to increase the value of their investment over the recommended holding period and who are able to bear a loss of up to the full amount invested.

The product is not open to residents of the United States of America/"U.S. Person" (the definition of "U.S. Person" is available on the Management Company's website www.amundi.com and/or in the prospectus).

Redemption and transaction: The Sub-fund's shares are listed and traded on one or more stock exchanges. Under normal circumstances, you can trade shares during stock exchange trading hours. Only authorised participants (e.g. selected financial institutions) can trade shares directly with the Sub-fund on the primary market. Further details are provided in the MULTI UNITS FRANCE prospectus.

Distribution Policy: As this is a non-distributing share class, investment income is reinvested.

* Secondary market: as the Sub-fund is an ETF, investors who are not Authorised Participants will ordinarily only be able to buy or sell its shares on the secondary market. As a result, investors will pay brokerage charges and/or transaction charges on their transactions on the stock market. These brokerage charges and/or transaction charges are neither charged nor payable by the Sub-fund or the Management Company, but by the investor's own intermediary. Furthermore, investors may also incur bid-ask spreads, i.e. the difference between the price a share may be sold at (ask price) and the price it may be bought at (bid price).

Primary market: Authorised Participants who trade directly with the Sub-fund will pay the transaction costs applicable to its primary market.

How long should I hold it and can I take money out early?

Recommended holding period: 5 years. This period is based on our assessment of the risk and reward characteristics and costs of the Sub-fund. This product is designed for medium-term investment; you should be prepared to stay invested for at least 5 years. You can redeem your investment at any time, or hold the investment longer.

Order schedule: Information on the order frequency can be found under "What is this product?". Please refer to the section "What are the costs?" for more information on the exit costs. A redemption cap mechanism (known as a "gate") may be implemented by the Management Company. How it would be operated is described in the Prospectus.

In the primary market, the management company may:

- Suspend the redemption of shares, if exceptional circumstances so require, taking into account the interest of investors.
- Manage liquidity risks by (i) limiting the number of shares redeemed for a short period of time, if redemption requests reach a predefined threshold beyond which these requests can no longer be executed in the interest of all investors ("**Redemption Cap**"), and (ii) applying anti-dilution levies to the Sub-fund to offset or reduce portfolio restructuring costs for the remaining investors.

On the secondary market, investors will generally be able to sell their shares on the relevant stock exchange. Additional details can be found in the prospectus.
