Objective and Investment Policy

This Sub-Fund is passively managed. The Sub-Fund is a financial product that promotes among other characteristics ESG characteristics pursuant to Article 8 of the Disclosure Regulation. The objective of this Sub-Fund is to track the performance of MSCI EMU ESG Broad CTB Select Net Total Return Index ("the Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index. The anticipated level of the tracking error, under normal market conditions, is indicated in the prospectus of the Sub-Fund. The Index is an equity index based on the MSCI EMU Index (the "Parent Index") representative of the large and mid-cap securities across developed European Economic and Monetary Union ("EMU") countries, that excludes companies from the Parent Index based on social or environmental criteria. Additionally, the Index aims to represent the performance of a strategy that reweights securities based upon the opportunities and risks associated with the climate transition to meet the EU Climate Transition Benchmark (EU CTB) regulation minimum requirements. For further information on the exclusions applied by the Index pursuant to the EU Climate Transition Benchmarks (CTB), please refer to the "Guidelines on funds' names using ESG or sustainability-related terms" section of the Prospectus. The Index is a Net Total Return Index: dividends net of tax paid by the index constituents are included in the Index return. The Index is constructed by applying a combination of values based exclusions and an optimization process that minimizes the ex-ante tracking error compared to the Parent Index while ensuring that the ESG score of the Index is at least equal to the ESG score of the Parent Index and to meet the EU Climate Transition Benchmark (EU CTB) regulation minimum requirements while targeting a similar risk profile to the Parent Index. More information about the composition of the Index and its operating rules are available in the prospectus and at: www.msci.com. The Index value is available via Bloomberg (MXEMUEBL). The exposure to the Index will be achieved through a direct replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents in a proportion extremely close to their proportion in the Index. The Investment Manager will be able to use derivatives in order to deal with inflows and outflows and which relate to the Index or constituents of the Index for investment and/or efficient portfolio management. In order to generate additional income to offset its costs, the Sub-Fund may also enter into securities lending operations.

MONTHLY COMMENTARY (Source: Amundi)

Management commentary

The eurozone delivered a positive surprise in July, with a preliminary estimate of Q2 growth significantly exceeding expectations. The Q2 flash GDP came in at +0.4% quarter-on-quarter (compared to 0.1% in Q1), bringing annual growth to +1.0% (versus +0.5% in Q1). This rebound follows several quarters of stagnation amid an energy shock linked to the conflict in the Persian Gulf.

The resumption of hostilities in the Persian Gulf weighed on investor sentiment in July. The dominant theme of the month was the sharp correction in semiconductor and memory stocks, which had driven markets higher in the first half of the year. Investors became increasingly skeptical about the future profitability of capex by tech giants in artificial intelligence infrastructure.

MONTHLY COMMENTARY (Source: Amundi)

Management commentary

The decline in US and Asian markets was partially offset by the outperformance of European and Chinese stock exchanges, which recorded gains of +0.5% for the Eurostoxx 50 and +13.9% for the HSCEI. In Europe, several large companies reported strong Q2 results as investors sought new themes. For example, Airbus saw a strong increase in its profits, as did Deutsche Bank and BNP Paribas, which confirmed a significant rise in their earnings.

Oil prices were extremely volatile in July, driven by the ups and downs of the Iran-US conflict. Brent crude reached a peak of $102 before returning to around $90 depending on periods of tension and calm. In the currency market, the dollar depreciated slightly. The euro-dollar moved back above 1.15 at the end of the month. The Fed's decision to keep its key rates unchanged supported emerging market currencies. The yen, meanwhile, appreciated by 3.2% following interventions in the currency market. Gold rose by 1.0% to $4046/ounce but remains under pressure.

Socially Responsible Investment (SRI)

The SRI expresses sustainable development objectives in investment decisions by adding Environmental, Social and Governance (ESG) criteria in addition to the traditional financial criteria.

SRI thus aims to balance economic performance and social and environmental impact by financing companies and public entities which contribute to sustainable development whatever their business sector. By influencing the governance and behaviour of stakeholders, SRI promotes a responsible economy.

Evaluation by ESG criteria (Source: Amundi)

	Benchmark	Parent index
Overall Rating	8.18	7.97
Environment	7.00	6.73
Social	5.64	5.57
Governance	6.57	6.57

Parent index : **MSCI EMU**

ESG criteria

The criteria are extra-financial criteria used to assess the Environmental, Social and Governance practices of companies.

Environmental, Social, and Governance risks and opportunities are posed by large scale trends (e.g. climate change, resource scarcity, demographic shifts) as well as by the nature of the company's operations.

Scores are on a 0-10 scale, with 10 being the best.

"E" for Environment (Climate Change, Natural Resources, Pollution & Waste and Environmental Opportunities)

"S" for Social (Human Capital, Product Liability, Stakeholder Opposition and Social Opportunities)

"G" for Governance (Corporate Governance and Corporate Behavior)

Parent index : **MSCI EMU**

Carbon footprint

This indicator measures the portfolio's carbon emissions in metric tonnes of carbon equivalent (tCO2e) per euro million invested.
This is an indicator of the emissions generated by investment in this portfolio.

Definition of scopes :

- Scope 1 : all emissions that arise directly from sources that are owned or controlled by the company.

- Scope 2 : all indirect emissions generated by the purchase or production of electricity, steam or heat.

- Scope 3 : All other indirect emissions, upstream and downstream of the value chain. For reasons of data robustness, Amundi has chosen to use emissions from activities upstream of Scope 3 - Source: Trucost EEI-O model (input/output model extended to the Trucost environment).

Source : The carbon emissions data is supplied by Trucost. It corresponds to companies' annual emissions expressed in tCO2e, which covers the six greenhouse gases defined in the Kyoto protocol whose emissions are converted into global warming potential (GWP) in CO2 equivalent.
