## Objective and Investment Policy

The Fund is a passively managed index-based UCITS. The Fund's objective is to replicate, both upwards and downwards, the performance of the IBEX 35 Net Return Index (net dividends reinvested) (the "Benchmark"), denominated in euro (EUR), the main Spanish stock exchange index, while minimising the tracking error between the Fund's performance and that of the Benchmark. The expected level of the Tracking Error under normal market conditions is indicated in the Fund prospectus. The Bolsa Madrid website (<http://www.bolsamadrid.es/ing/asp/Indices/Resumen.aspx>) provides more detailed information about the Bolsa Madrid indices. The Fund aims to achieve its objective through direct replication, namely by investing primarily in the components of the Benchmark. In order to optimise Benchmark replication, the Fund may use a sampling technique, as well as guaranteed temporary sales of securities. Any use of these techniques is indicated on the website [amundiETF.com](http://amundiETF.com). The updated composition of the portfolio of securities held by the Fund is mentioned on the website [amundiETF.com](http://amundiETF.com). In addition, the indicative net asset value appears on the Fund's Reuters and Bloomberg pages and may also be mentioned on the Fund's stock exchange websites. The Fund is eligible for the French Plan d'Epargne en Actions (PEA) and, consequently, invests a minimum of 75% of its assets in the shares of European Union countries.

Any losses or gains do not take into consideration any costs, commissions and fees incurred by the investor in the issue and buyout of the shares (e.g. taxes, brokerage fees or other commissions deducted by the financial intermediary). If performance is calculated in a currency other than the euro, any losses or gains generated can thereby be affected by exchange rate fluctuations (both upward and downward). The discrepancy accounts for the performance difference between the portfolio and the index.
