The SRI is not guaranteed and may change over time. The risk indicator assumes you keep the product for 5 years. The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movement in the markets or because we are not able to pay you.

* Source : Amundi. The above cover complete periods of 12 months for each calendar year. **Past performance is no predictor of current and future results and does not guarantee future yield**. Any losses or gains do not take into consideration any costs, commissions and fees incurred by the investor in the issue and buyout of the shares (e.g. taxes, brokerage fees or other commissions deducted by the financial intermediary). If performance is calculated in a currency other than the euro, any losses or gains generated can thereby be affected by exchange rate fluctuations (both upward and downward). The discrepancy accounts for the performance difference between the portfolio and the index.

Index Data (Source : Amundi)

Description of the Index

The Index is an equity index based on the MSCI USA Index representative of the large and mid-cap stocks of the US market ("Parent Index"). The Index is representative of the performance of stocks issued by companies with robust environmental, social and governance ("ESG") profile relative to their sector peers and/or which experienced a yearly improvement in these ESG profile.

The Index is selected by applying a range of filters based on ESG ratings as well as certain environmental and social exclusions, such as companies that are involved in controversial weapons, nuclear weapons, gambling and adult entertainment. Companies whose products or activities have negative social or environmental impacts are excluded from the Index.

The Index is constructed using a "Best-in-class approach": best ranked companies in each sector are selected to construct the Index. "Best-in-class" is an approach where leading or best-performing investments are selected within a universe, industry sector or class. Using such Best-in-class approach, the Sub-Fund follows an extra-financial approach significantly engaging that permits the reduction by at least 20% of the initial investment universe (expressed in number of issuers).

The Index is a net total return index, meaning that dividends net of tax paid by the index constituents are included in the Index return.

More information about the composition of the Index and its operating rules are available in the prospectus and at: [msci.com](https://www.msci.com)
