## Objective and Investment Policy

This Sub-Fund is passively managed. The objective of this Sub-Fund is to track the performance of MSCI USA ESG Selection P-Series Extra Net Return USD Index (the "Index"). The anticipated level of tracking error, under normal market conditions, is indicated in the prospectus of the Sub-Fund. The Index is an equity index based on the MSCI USA Index representative of the large and mid-cap stocks of the US market ("Parent Index"). The Index is representative of the performance of stocks issued by companies with robust environmental, social and governance ("ESG") profile relative to their sector peers and/or which experienced a yearly improvement in these ESG profile. The Index is selected by applying a range of filters based on ESG ratings as well as certain environmental and social exclusions, such as companies that are involved in controversial weapons, nuclear weapons, gambling and adult entertainment. Companies whose products or activities have negative social or environmental impacts are excluded from the Index. The Index is constructed using a "Best-in-class approach": best ranked companies in each sector are selected to construct the Index. "Best-in-class" is an approach where leading or best-performing investments are selected within a universe, industry sector or class. Using such Best-in-class approach, the Sub-Fund follows an extra-financial approach significantly engaging that permits the reduction by at least 20% of the initial investment universe (expressed in number of issuers). The Index is a net total return index, meaning that dividends net of tax paid by the index constituents are included in the Index return. More information about the composition of the Index and its operating rules are available in the prospectus and at: msci.com The Index value is available via Bloomberg (NU718008). The limits of the approach adopted are described in the Sub-Fund's prospectus through ESG Risks factors such as Risk linked to ESG Methodologies and to ESG score computation. The ESG score of companies is calculated by an ESG rating agency, using raw data, models and estimates models and estimates collected/calculated using methods specific to each provider. Due to the lack of standardisation and the uniqueness of each methodology, the information provided may be incomplete. The Index applies exclusions to companies involved in activities considered non-aligned with the Paris Climate Agreement (coal extraction, oil, etc.). For further information on the exclusions applied by the Index pursuant to the EU Paris-aligned Benchmarks (PAB), please refer to the "Guidelines on funds' names using ESG or sustainability-related terms" section of the Prospectus. The exposure to the Index will be achieved through a Direct Replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents in a proportion extremely close to their proportion in the Index. The Investment Manager will be able to use derivatives in order to deal with inflows and outflows and which relate to the Index or constituents of the Index for investment and/or efficient portfolio management. In order to generate additional income to offset its costs, the Sub-Fund may also enter into securities lending operations.

## Calendar year performance\* (Source: Fund Admin)

|           | 2025   | 2024 | 2023 | 2022 | 2021 |
|-----------|--------|------|------|------|------|
| Portfolio | 15.39% | -    | -    | -    | -    |
| Benchmark | 15.03% | -    | -    | -    | -    |
| Spread    | 0.36%  | -    | -    | -    | -    |

\* Source : Amundi. The above cover complete periods of 12 months for each calendar year. **Past performance is no predictor of current and future results and does not guarantee future yield**. Any losses or gains do not take into consideration any costs, commissions and fees incurred by the investor in the issue and buyout of the shares (e.g. taxes, brokerage fees or other commissions deducted by the financial intermediary). If performance is calculated in a currency other than the euro, any losses or gains generated can thereby be affected by exchange rate fluctuations (both upward and downward). The discrepancy accounts for the performance difference between the portfolio and the index.

## Risk indicators (Source: Fund Admin)

|                      | 1 year | Inception to date * |
|----------------------|--------|---------------------|
| Portfolio volatility | 12.90% | 16.07%              |
| Benchmark volatility | 12.17% | 15.75%              |
| Sharpe ratio         | 1.07   | 0.64                |

\* Volatility is a statistical indicator that measures an asset's variations around its average value. For example, market variations of +/- 1.5% per day correspond to a volatility of 25% per year. The higher the volatility, the higher the risk.

## EQUITY

## Risk Indicator (Source : Fund Admin)

The SRI represents the risk and return profile as presented in the Key Information Document (KID). The lowest category does not imply that there is no risk. The SRI is not guaranteed and may change over time. The risk indicator assumes you keep the product for 5 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movement in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions could impact our capacity to pay you. Additional risks: Market liquidity risk could amplify the variation of product performances. This product does not include any protection from future market performance so you could lose some or all of your investment. Beside the risks included in the risk indicator, other risks may affect the Sub-Fund's performance. Please refer to the AMUNDI ETF ICAV prospectus.

## Index Data (Source : Amundi)

## Description of the Index

The Index is an equity index based on the MSCI USA Index representative of the large and mid-cap stocks of the US market ("Parent Index"). The Index is representative of the performance of stocks issued by companies with robust environmental, social and governance ("ESG") profile relative to their sector peers and/or which experienced a yearly improvement in these ESG profile.

The Index is selected by applying a range of filters based on ESG ratings as well as certain environmental and social exclusions, such as companies that are involved in controversial weapons, nuclear weapons, gambling and adult entertainment. Companies whose products or activities have negative social or environmental impacts are excluded from the Index.

The Index is constructed using a "Best-in-class approach": best ranked companies in each sector are selected to construct the Index. "Best-in-class" is an approach where leading or best-performing investments are selected within a universe, industry sector or class. Using such Best-in-class approach, the Sub-Fund follows an extra-financial approach significantly engaging that permits the reduction by at least 20% of the initial investment universe (expressed in number of issuers).

The Index is a net total return index, meaning that dividends net of tax paid by the index constituents are included in the Index return.

More information about the composition of the Index and its operating rules are available in the prospectus and at: [msci.com](https://www.msci.com)
