Objective and Investment Policy

The Fund is a passively managed index-based UCITS. The Fund's objective is to replicate, both upwards and downwards, the performance of the MSCI India Net Total Return Index (net dividends reinvested) (the "Benchmark"), denominated in US dollars (USD) and representative of the market performance of listed large- and mid-cap companies in India, while minimising the tracking error between the Fund's performance and that of the Benchmark. The expected level of the Tracking Error under normal market conditions is indicated in the Fund prospectus. More detailed information on MSCI indices is available on the MSCI website (www.msci.com). The Fund aims to achieve its objective by means of indirect replication, namely by entering into one or more OTC swaps (forward financial instruments, "FFIs"). The Fund may invest in a diversified portfolio of international shares whose performance will be exchanged against that of the Benchmark through FFIs. The updated composition of the portfolio of securities held by the Fund is mentioned on the website amundiETF.com. In addition, the indicative net asset value appears on the Fund's Reuters and Bloomberg pages and may also be mentioned on the Fund's stock exchange websites.

Any losses or gains do not take into consideration any costs, commissions and fees incurred by the investor in the issue and buyout of the shares (e.g. taxes, brokerage fees or other commissions deducted by the financial intermediary). If performance is calculated in a currency other than the euro, any losses or gains generated can thereby be affected by exchange rate fluctuations (both upward and downward). The discrepancy accounts for the performance difference between the portfolio and the index.
