Objective and Investment Policy

The Fund is an index-tracking UCITS passively managed. The investment objective is to track both the upward and downward evolution of the MSCI WORLD INFORMATION TECHNOLOGY Net Total Return Index (net dividends reinvested) ("Benchmark Index"), representative of technology companies from the developed world markets, while minimizing the volatility of the difference between the return of the Fund and the return of the Benchmark Index (the "Tracking Error"). The anticipated level of Tracking Error in normal market conditions is indicated in the prospectus. Additional information about the Benchmark Index can be found at <https://www.msci.com/>. The Benchmark Index is a net total return index. A net total return index calculates the performance of the index constituents on the basis that any dividends or distributions are included in the index returns after withholding tax retention. The Fund seeks to achieve its objective via indirect replication by entering into an over-the-counter swap contract (financial derivative instrument, the "FDI"). The Fund may also invest in a diversified portfolio of international equities, whose performance will be exchanged against the performance of the benchmark Index via the FDI. Updated composition of the Fund holdings is available on www.amundi-etf.com. In addition, the indicative net asset value is published on the Reuters and Bloomberg pages of the Fund, and might also be mentioned on the websites of the stock exchanges where the Fund is listed.

Performances from 30/09/2016 to 30/09/2026 (Source : Fund Admin)

Risk indicators (Source: Fund Admin)

	1 year	3 years	Inception to date *
Portfolio volatility *	22.25%	23.33%	20.19%
Benchmark volatility	22.25%	23.33%	20.17%
Ex-post Tracking Error	0.01%	0.02%	0.04%
Sharpe ratio	1.28	1.31	0.89

* Volatility is a statistical indicator that measures an asset's variations around its average value. For example, market variations of +/- 1.5% per day correspond to a volatility of 25% per year. The higher the volatility, the higher the risk. The Tracking Error indicator measures the performance's difference between the fund and the benchmark

Spread	-0.48%	-0.49%	-0.57%	-0.26%	-0.41%	-0.52%	-0.57%	-0.27%	-0.25%	-0.45%

* Source : Amundi. The above cover complete periods of 12 months for each calendar year. **Past performance is no predictor of current and future results and does not guarantee future yield.** Any losses or gains do not take into consideration any costs, commissions and fees incurred by the investor in the issue and buyout of the shares (e.g. taxes, brokerage fees or other commissions deducted by the financial intermediary). If performance is calculated in a currency other than the euro, any losses or gains generated can thereby be affected by exchange rate fluctuations (both upward and downward). The discrepancy accounts for the performance difference between the portfolio and the index.

EQUITY

Risk Indicator (Source : Fund Admin)

⚠ The SRI represents the risk and return profile as presented in the Key Information Document (KID). The lowest category does not imply that there is no risk. The SRI is not guaranteed and may change over time. The risk indicator assumes you keep the product for 5 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movement in the markets or because we are not able to pay you.

We have classified this product as 5 out of 7, which is a medium-high risk class. This rates the potential losses from future performance at a medium-high level, and poor market conditions will likely impact our capacity to pay you. Additional risks: Market liquidity risk could amplify the variation of product performances. This product does not include any protection from future market performance so you could lose some or all of your investment. Beside the risks included in the risk indicator, other risks may affect the Sub-Fund's performance. Please refer to the MULTI UNITS LUXEMBOURG prospectus.

Index Data (Source : Amundi)

Description of the Index

The MSCI Daily TR World Net Information Technology USD is a free float-adjusted market capitalization index that is designed to measure the investable universe and the performance of the Information Technology listed companies. It is designed to cover large and mid cap securities and is constructed using the MSCI Global Investable Market Index (GIMI) methodology to match the size, liquidity and minimum free float criteria. The complete methodology of the index is available on www.msci.com.
