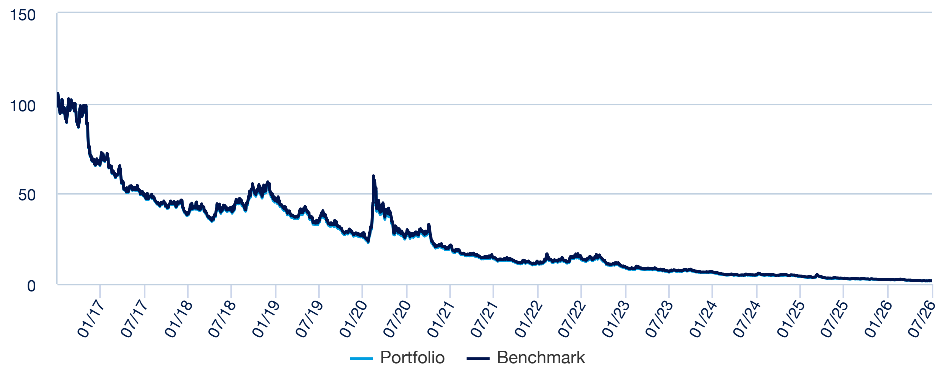
EQUITY

Objective and Investment Policy

The Fund is a passively managed index-based UCITS. The Fund's objective is to be inversely exposed with a daily rebalancing to the Italian stock market by replicating, both upwards and downwards, the performance of the FTSE MIB Super Short Strategy RT Gross TR strategy index (gross dividends reinvested) (the "Benchmark"), denominated in euro (EUR) and which is a short selling strategy (with a daily -2x leverage effect), with daily rebalancing, on the FTSE MIB® index (net dividends reinvested) (the "Parent Index"), by measuring the development of the 40 largest stocks listed on the Borsa Italiana while minimising the tracking error between the Fund's performance and that of the Benchmark. The expected level of the Tracking Error under normal market conditions is indicated in the Fund prospectus. Over a period of one working day, any appreciation in the value of the Parent Index shall lead to stronger depreciation of the net asset value of the Fund, meaning that investors will therefore not benefit from the appreciation in the value of the Parent Index. However, for a period greater than one working day, due to the daily leverage readjustment conducted in the Benchmark, the performance of the Fund will not be equal to double the inverse of the performance of the Parent Index and may even follow an identical (i.e. not inverse) development. The FTSE website (www.ftse.com) provides more detailed information about FTSE indices. The Fund aims to achieve its objective by means of indirect replication, namely by entering into one or more OTC swaps (forward financial instruments, "FFIs"). The Fund may invest in a diversified portfolio of international shares whose performance will be exchanged against that of the Benchmark through FFIs. The updated composition of the portfolio of securities held by the Fund is mentioned on the website amundietf.com. In addition, the indicative net asset value appears on the Fund's Reuters and Bloomberg pages and may also be mentioned on the Fund's stock exchange websites.

Performances from 01/08/2016 to 31/07/2026 (Source : Fund Admin)



Risk indicators (Source: Fund Admin)

	1 year	3 years	Inception to date *
Portfolio volatility	31.78%	32.82%	46.49%
Benchmark volatility	31.78%	32.82%	-
Ex-post Tracking Error	0.15%	0.14%	-
Sharpe ratio	-1.53	-1.26	-0.58

* Volatility is a statistical indicator that measures an asset's variations around its average value. For example, market variations of +/- 1.5% per day correspond to a volatility of 25% per year. The higher the volatility, the higher the risk.
The Tracking Error indicator measures the performance's difference between the fund and the benchmark

** Source : Amundi. The above cover complete periods of 12 months for each calendar year. **Past performance is no predictor of current and future results and does not guarantee future yield** . Any losses or gains do not take into consideration any costs, commissions and fees incurred by the investor in the issue and buyout of the shares (e.g. taxes, brokerage fees or other commissions deducted by the financial intermediary). If performance is calculated in a currency other than the euro, any losses or gains generated can thereby be affected by exchange rate fluctuations (both upward and downward). The discrepancy accounts for the performance difference between the portfolio and the index.*

Risk Indicator *(Source : Fund Admin)*

1 2 3 **6** 4 5 7

Lower Risk — Higher Risk

The SRI represents the risk and return profile as presented in the Key Information Document (KID). The lowest category does not imply that there is no risk. The SRI is not guaranteed and may change over time. The risk indicator assumes you keep the product for 1 Day.
The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movement in the markets or because we are not able to pay you.

We have classified this product as 6 out of 7, which is the second highest risk class. This rates the potential losses from future performance at a high level, and poor market conditions are very likely to impact our capacity to pay you. Additional risks: Market liquidity risk could amplify the variation of product performances. This product does not include any protection from future market performance so you could lose some or all of your investment. Beside the risks included in the risk indicator, other risks may affect the Sub-fund's performance. Please refer to the MULTI UNITS FRANCE prospectus.

Index Data (Source : Amundi)

Description of the Index

The FTSE MIB Super Short Strategy RT Gross TR Index attempt to replicate the inverse returns experienced by an investor attaining the negative daily performance of the underlying headline index i.e. by short selling the index with a daily rebalance. The cost of dividends and benefit of earning interest for the short position are taken into account in the index calculation of the short indices, as is the cost of borrowing stock. The short indices are derived from the existing underlying headline Total Return Indices.

Important information

Note on the Fund management company and the fund

The Fund is described in a Key Information Document (KID), or Key Investor Information Document (KIID) for UK investors, and prospectus. The Funds KID, or KIID for UK investors, must be made available to potential subscribers prior to subscription.
The prospectus in Dutch for French UCITS ETFs, for Luxembourg UCITS ETFs and Irish ETFs, and the KID in English are available free of charge on www.amundi.com. They are also available from the headquarters of Amundi Luxembourg S.A. (as the management company of Amundi Index Solutions and Multi Units Luxembourg), or the headquarters of Amundi Asset Management (as the management company of French FCPs and Multi Units France), or at the headquarters of Amundi Ireland Limited (as the management company of Amundi ETF ICAV and Amundi ETF II ICAV). Regarding Funds admitted on a regulated market, the listing is subject to a volatility control mechanisms to ensure that the ETF price does not deviate significantly from a reference price set by the listing rules of the relevant regulated market, notably through the implementation of a trading halt mechanism in case of significant deviation from this reference price.

The Fund offers no capital guarantee. Investors may not get back the full amount of their initial investment, particularly in the event that the benchmark index falls. Subscribing to a UCITS may involve risks. Potential investors are advised to read the Funds risk profile, which is described in detail in the prospectus. The amount that is reasonable to invest in the Fund will depend on the personal circumstances of each investor. To determine this amount, investors should take into account their financial situation, personal assets, and current and future requirements, as well as considering their willingness to accept risks or conversely their preference to invest cautiously. Investors are also strongly recommended to sufficiently diversify their investments so as to avoid being exposed solely to the risks of this Fund. Investors should therefore seek advice in this regard from their usual advisors (legal, tax, financial and/or accounting) before purchasing any units of the Fund.
The source of the data contained in this document is Amundi Asset Management unless otherwise stated.

Policy regarding portfolio transparency and warning on secondary market
The policy regarding portfolio transparency and information on the funds assets are available on amundietf.com. Shares purchased on the secondary market cannot usually be sold directly back to the fund. Investors must buy and sell shares on a secondary market with the assistance of an intermediary (e.g. a stockbroker) and may incur fees for doing so. Investors may pay more than the current net asset value when buying shares and may receive less than the current net asset value when selling them.
